Then.

$$\frac{2l}{p} = \frac{\lambda}{\sqrt{1-\left(\frac{\lambda}{2a}\right)^2}} \Rightarrow f = 9.015\,\mathrm{GHz}$$

$$\frac{4l^2}{p^2}\left(1-\frac{\lambda^2}{4a^2}\right) = \lambda^2$$

$$\frac{4l^2}{p^2} = \left(1+\frac{l^2}{a^2p^2}\right)\lambda^2$$

$$\lambda = \frac{2l}{p}\frac{1}{\sqrt{1+\frac{l^2}{a^2p^2}}}$$
