The Start of Autumn is significant for farmers, as various autumn crops quickly grow and mature, and harvest season is about to come.

从前有个农夫嫌他种的禾苗长得慢，就到地里把禾苗一株株地拔高了一点。回家后他对家人说:“今天可真把我累坏了!但我总算让禾苗一下子长高了。”儿子到地里去一看，禾苗都已经死光了。

现在有些家长急于让孩子成功，往往步那个农夫的后尘，搞得孩子苦不堪言，却不见孩子学业长进。这样的家长是否该对这个问题有所醒悟，让孩子自然成长呢?

Once upon a time, there was a farmer who was dissatisfied with the slow growth of his seedlings, so he went to the field and pulled up the seedlings one by one. When he got home, he said to his family, "I've had a really exhausting day! But I managed to make the plants grow taller." When the son went to the field, all the seedlings were dead.

Now some parents, anxious for their children to succeed, often follow in the farmer's footsteps, making their children miserable but neglecting their academic progress. Should such parents wake up to this problem and let their children grow up naturally?

The system collects a large amount of rainwater and snow melt water that seep into the ground in spring and summer, and draws it to the ground through the natural slope of the mountain to irrigate farmland and meet people's daily water needs. Karez reduces the evaporation of water on the ground and does little damage to the surface, thus effectively protecting the natural resources and the ecological environment.
